Number of Pages: 6 including cover**Message: Assurances, SRT ASNT Level III**

Mark

I am sending you Kevin Harkreader's ASNT Level III as well as my Level II from ASNT's web page. I can provide you copies of the actual certificates if you need. I spoke with Dr. Gorman and he said he would contact you about his and Dr. Ziola's Phd credentials. They are willing to provide 3AL full support for maintaining the Reflex system. He will provide me documentation after speaking with you. He is also granting us the right to use the Reflex technology. Faming Li the original designer of the software and hardware integrations has pledged his full support to assure the Reflex systems quality level.

Robert Fick

To Whom It May Concern:

My name is Faming Li. I am one of the original designers of ReFlex Scanner. I designed and coded the software system of this scanner. I did all seven ReFlex scanner system integrations (hardware and software), tests, troubleshooting, fine-tunings, calibrations, and maintenances.

I will be glad to work with Three AL Test to maintain the ReFlex scanner they possess, to do any software modification according to DOT requirements to assure their scanner is operated at a proper (designed) quality level.

Sincerely,

Faming Li

>
> Dear Mark,
>
> I was very pleased to hear from Robert Fick that you and Ryan Posten
are
> working quickly to get Robert and Paul up and running.
>
> The PhD part is excellent but please make it in just Engineering or
> Physics, not ME and EE. Many, if not most, PhD's in ultrasound
related
> areas are in Physics Departments. Steve's PhD is in Aeronautics and
> Astronautics. The famous program in ultrasound at Ohio State is
actually
> in the Welding Engineering Department. Mine is in Physics, even
though I
> taught mechanical engineering courses, including elasticity and wave
> propagation in engineering departments (Engineering Mechanics at U.
> Nebraska, Lincoln, NE and Aeronautical Engineering at The Naval
> Postgraduate School in Monterey, CA). The ultrasound guys at NASA
Langley
> Research Center are mostly physicists; but some are Materials Science
and
> Engineering PhDs like those from Johns Hopkins. The Physics PhD
applies
> to many of the ultrasound researchers at the Naval Research Lab in
> Washington, D.C. Northwestern U's ultrasound program is in the Civil
> Engineering Department. So, a PhD in Engineering or Physics would
cover
> the scope intended.
>
> We will support the ReFlex equipment. We have rehired the ME, Butch
> Miller, who did all the drawings and supervised assembly, not to
mention
> Steve Ziola who guided the whole design. Steve and I both worked on
the
> algorithms that make the machine work so well and we have Jeff
Gentry, a
> very good programmer who can make any changes and upgrades we need.
We
> have access to Faming Li, the original programmer. We can't afford
to
> hire him back at the moment but we are helping him in his job search

and

> providing outstanding references. We have good relations with all the

> suppliers of the main components. Neil Jacques, the President of
> In-Position Technologies, our supplier of the Parker motors,
controllers

> and drivers, said he was glad we were back. "You're the right ones,"
he

> said.

>

> We will support 3AL's exemptions. We agree to be the SRT. I think
you

> would desire this rather than have an arbitrary Level III who is not
in

> the business. I've indicated to Robert that we will work with them
> regarding reasonable patent license and SRT fees.

>

> We are committing ourselves to this business once again. We have our
> application ready to go and it contains some of the information
above.

> You anticipated much of it. Thank you for your interest and I hope
in

> the future that we can live up to your expectations for progress in
public

> safety.

>

> Sincerely,

>

> Mike Gorman
